

“hin&herzo - the Cultural Festival”!

The former “Herzogenaurach Culture Days” have now become the Cultural Festival: One weekend between summer and autumn, full of cultural enjoyments under one thrilling theme. A festival in the heart of Herzogenaurach, providing easy access and lots of sensible, but also ambiguous controversial cultural experiences.

“hin&herzo - the Cultural Festival” was your chance to experience artists from all over Germany, but also from our own region, in the town center of Herzogenaurach, on the last September weekend. In 2018, the festival theme was “Revolution” which was dealt with by lectures, literature, music, theater, performances, movies, new media and installations.

Indoor and outdoor, high and low volume, church naive and hair salon, renowned artists and newcomers: The 2018 festival under the festival theme of “Revolution” did not only invite all visitors to spend some exciting cultural days, but was also a chance for local restaurants and retailers to present themselves.

“hin&herzo - the Cultural Festival” is organized by the Town of Herzogenaurach in cooperation with dedicated creative artists, representatives of different cultural institutions and representatives of the town council fractions.
