Wastewater Treatment

Water is being used in many different ways in private households, businesses and public facilities. For most people the removal of wastewater is completed as soon as it has disappeared into the plug hole. However, for the approx. 15 employees of the Department for Wastewater Treatment in Herzogenaurach, this is only the beginning of their work. It actually is a work which most citizens of Herzogenaurach do hardly recognize since most wastewater systems are hidden underground.

Legal Basis

Sewage disposal is a compulsory task of the communities. This has been determined by the Federal Water Act (WHG) and the Bavarian Water Act (BayWG). In our town, sewage disposal is the task of the Department for Wastewater Treatment in Herzogenaurach (SEH). Details are defined by the Regulations on the Public Sewerage System of the Town of Herzogenaurach (EWS) in connection with the Regulations on Contributions and Fees regarding the EWS.

Tasks of the Department for Wastewater Treatment

- Sewage system and sewage plant
- Estate drainage systems
- Approval of sewerage systems for new buildings and reconstructions
- Supervision of estate drainage systems
- Grease separators and interceptors
- Sewage disposal charges
